

Houston Marriott Medical Center

Our “Green” Vision

The Houston Marriott Medical Center began its environmental efforts in 2007 with the focus of a Recycling and Waste program and the adoption of a formal recycling policy for the hotel. Within two years, our hotel expects the results of our aggressive recycling measures and the hotel-wide promotion, Houston Marriott Medical center will have increased its percentage of recycled waste from 5% to 13%. The hotel will then broadened its environmental focus, and in 2008 create the Green Practices Committee. This unique committee is comprised of executive leadership, managers, supervisor and associates from many disciplines throughout the hotel, and focuses on a wide range of hotel environmental issues including recycling, purchasing, energy use, dining, buildings and construction, transportation, and communications & outreach. The diversity of expertise and experience among the committee members results in innovative collaboration, teamwork, and successes that may not otherwise be achieved.

“Green” Initiatives

- Recycle batteries, bulbs and ballasts
- Recycling used cooking oil
- Had Retro-commissioning audit done
- Implemented just like home linen program
- Public restrooms have automatic low flowing faucets and toilets
- Energy management system in place
