## Pillow Menu

---

Your good night's sleep is important to us. Our Westin Heavenly Bed® features a unique pillow-top design that provides superior comfort and support. And our standard pillows are already allergy pillows. If you need a different pillow, please feel free to choose from the following pillow menu:

### **ANTI-SNORING PILLOW**

The special feature of an anti-snoring pillow is the elevation in the middle of the pillow. In a conventional pillow, there is usually a depression in the middle to allow the head to rest. The elevation is intended to prevent exactly that and "force" the sleeper to roll onto his side.

### **BAMBOO PILLOW**

People who sweat particularly heavily at night are well served with a bamboo pillow. Bamboo has an antibacterial effect and is considered temperature balancing. Thus, it has a cooling effect in the summer.

### **ORTHOPEDIC PILLOW**

The orthopedic back pillow rests on the back. The goal with this pillow is also to have a correct sitting posture and thus relieve tension and back pain.

### **NECK SUPPORT PILLOW**

Neck support pillows support the cervical spine in its natural position and relieve the neck muscles.

### **CHERRY PIT PILLOW**

You have a stomach ache or suffer from a sprain? A cherry pit pillow can help here: Its cooling function is used for sprains/bruises, for colds or stomach aches it provides comfort as a heat pad.

**Please order your desired pillow via our Service Express®. We will then bring the pillow(s) to your room.**
